

## Tire-Derived Product (TDP) Grant Program

### PURPOSE

CalRecycle's Tire-Derived Product Grant Program (TDP Program) promotes markets for recycled-content products derived from waste tires generated in California. The TDP Program provides grants for the purchase of various tire-derived products such as landscape mulch or bark, playgrounds, athletic tracks, sidewalks, sport surfacing, traffic safety products, and more.

### ELIGIBILITY

The project must be located in California and use a minimum of 2,500 Passenger Tire Equivalents (PTE) from California-generated waste tires. Truck tire buffings are not eligible for reimbursement due to relatively strong market demand.

Cities, counties, school districts, colleges and universities, special districts, state agencies, and qualifying Indian Tribes may apply.

TDP Grant Program Funding for Fiscal year (FY) 2011/12 is a proposed total of \$3,400,000 (subject to change).

Reimbursement is based on the actual cost of materials, tax and shipping up to \$5 per PTE, with a maximum grant amount of \$150,000.

### Proposed Timeline for FY 2011/12

Date	Activity
Summer 2011	FY 2011/12 program criteria presented at CalRecycle Public Meeting
Fall 2011	Post Notice of Funds Available, Application, and Application Guidelines and Instructions on the CalRecycle website
Late fall 2011	Application Deadline
Winter 2012	Grant awards presented for consideration/approval
